- **U** Validates the valuations: Transaction prices above the book value validates the portfolio valuations. High margins above the cost value is a testament to value creation
- Strengthens the liquidity: Properties sold above above book value create NAV growth and the proceeds partially fund the buyback of shares deeply below the NAV. The remaining boosts the Company's liquidity position and can be utilized for other corporate activities
- □ Signed disposals are reclassified as asset held for sale and thus excluded from the portfolio

SHARE BUYBACK PROGRAM

ShareholderValue Creation **Disposals** above **Discount to NAV Current Share** June 2020 EPRA book value NAV per share Price

CAPITAL MARKET ACTIVITY

✓ AT has been the largest listed European RE capital market issuer in 2016, 2017 and 2019

✓ Issuances via different instruments and different currencies, with currency hedges to Euro in place, demonstrate AT's broad and diverse investor base as well as strong demand to AT's instruments. These not only provide diversification of the investor base but also eliminate dependency on any single markets, instruments or currencies. Currency risk is hedged through swap agreements to Euro.
